Antisense knockdown of Kirsten-ras inhibits fibrosis in a rat model of unilateral ureteric obstruction

Primary culture of human renal proximal tubule epithelial cells and interstitial fibroblasts.

Association between haemolysis and albuminuria in adults with sickle cell anaemia

Sickle cell nephropathy - a practical approach

MicroRNA-21 and -214 are consistently modulated during renal injury in rodent models.

Measurement of Serum Lanthanum in Patients Treated with Lanthanum Carbonate by Inductively Coupled Plasma-Mass Spectrometry.

Could sickle cell trait be a predisposing risk factor for CKD?
Shaw C, Sharpe CC.
Nephrology, Dialysis, Transplantation 2010 August 25(8): 2403-2405

Acute human parvovirus B19 infection and nephrotic syndrome in patients with sickle cell disease.

Rho isoforms have distinct and specific functions in the process of epithelial to mesenchymal transition.

Silencing genes in the kidney: antisense or RNA interference?

Insulin-like growth factor-1 induces hyperproliferation of PKD1 cystic cells via a Ras/Raf dependent signalling pathway.
The role of geranylgeranylated proteins in human mesangial cell proliferation

Prenylation is not necessary for endogenous Ras activation in non-malignant cells

The inhibition of human mesangial cell proliferation by s-trans-trans-farnesylthiosalicylic acid

Expression of Ras GTPases in normal kidney and in glomerulonephritis.

Targeting Ras genes in kidney disease.

Signaling: focus on Rho in renal disease.
Sharpe CC and Hendry BM. Journal of the American Society of Nephrology 2003 Jan;14(1):261-4

Expression of voltage-gated K(+) channels in human atrium.
Bertaso F, Sharpe CC, Hendry BM and James AF. Basic Research in Cardiology 97: 424-433, 2002

The role of Ras isoforms in the stimulated proliferation of adult human renal fibroblasts in primary culture.

Evidence of a role for Ki-Ras in the stimulated proliferation of renal fibroblasts.
